John D. Kelly
United Kingdom

John D. Kelly (JDK) is Professor of Uro-oncology at University College London and Honorary Consultant Urologist at University College London Hospital. He is the Director for robotic surgery at the Chitra Sethia Centre and lead for urology at UCLH. UCLH is the UK's largest prostate cancer surgical centre and specialises in minimal access and minimal invasive therapies. John Kelly has expertise in complex pelvic surgery and integrates high quality clinical activity with translational research. He is the principal investigator for four multicentre randomised controlled trials (CRUK funded) and was Chair of the NCRI Bladder Cancer Clinical Study Group. He holds the Orchid Chair of Urology at Barts Hospital, Queen Mary University London.

JDK leads a genomics research group investigating epigenetic and genomic alterations in bladder cancer which can be exploited to predict outcomes and detect disease.

JDK received his medical degree from The Queen's University of Belfast. He was awarded The Professor Geoffrey D. Chisholm Prize, The Calvert Medal and the Ethicon Foundation Prize. He was a recipient of a British Urological Foundation Award following which he completed a Fellowship at the New York Presbyterian Hospital – Weill Medical College of Cornell University, New York. He was a Senior Lecturer in Uro-Oncology at Cambridge University studying genomic alterations in cancer to identify novel alterations and key processes in tumourigenesis.
